Highlights

Production of bituminous coal and lignite in the week ended July 28, 1984, as estimated by the Energy Information Administration, 19,161,000 short tons. This was an increase of 575,000 short tons or 3.1 percent from production in the previous week. Production in the corresponding week of 1983 15,488,000 short tons. Bituminous coal and lignite production from January 1 through July 28, 1984 totaled 517,846,000 short tons, 19.5 percent above production in the same period in 1983.

Production of Pennsylvania anthracite in the week ended July 28, 1984, as estimated by Energy Information Administration, was 98,000 short tons, 3,000 short or 3.2 percent more than production in the previous week. Production in the corresponding week of 1983 was 96,000 short tons. Anthracite production from January 1 through July 28, 1984 totaled 2,284,000 short tons, 7.1 percent above production in the same period in 1983.
